Family Business

TRADITION AND INNOVATION

Gessi is a family story, founded in 1992 by the visionary Umberto and his son Gian Luca. Rooted in the heart of Valsesia, the company seamlessly blends craftsmanship, innovation, and sustainability, becoming a symbol of Made in Italy and global lifestyle. In recent years, Gian Luca's sons, Nicolò and Emanuele, have passionately carried forward the family tradition, contributing to the company's growth. This commitment is reflected in the wellness of both people and the local community, while preserving our heritage and the territory that hosts us.

Welcome to our home

PARCO GESSI

MADE IN ITALY | LOCAL INVESTMENTS | ENERGY AUTONOMY

Gessi covers an area of 1,500,000 square metres of green park, with a deep bond between the company and its territory: Valsesia. Here, amidst mountains that offer views of rare beauty, watercourses that provide a precious resource, and a culture deeply rooted in tradition but projected towards the future, Valsesia has moulded the essence of Gessi. A company that has always been committed to sustainability, expressing its constant and innate commitment through a strong environmental, economic, organisational, cultural and social responsibility.

CO² EMISSION REDUCTION | ETHICAL BUSINESS

Talented People

FOSTERING EXCELLENCE AND GROWTH

A fundamental strategic asset, our real human capital writes daily the history of Gessi. A climate of respect, loyalty and trust, while listening to the market, creates a positive environment in which everyone can express their potential. Refined materials, innovative processes and tailor-made technologies are the result of this commitment, blending craftsmanship and innovation into unparalleled excellence. This is Made in Gessi.

COMPETENCE | COMMITMENT | PROGRESS

100% MADE IN GESSI

**BEAUTIFULLY DESIGNED,
PERFECTLY MADE**

Gessi believes in continuous improvement, that is why the company invests over 10% of our profits in R&D every year to fuel technological innovation and upgrade our factory. We have an internal team of 25 people working on product R&D, new materials, process innovation, certifications and quality improvement.

The Art of Manufacturing

Gessi maintains strong roots in its home territory and carries out each production phase in-house, ensuring 100% of its product components are made in Europe. The Company boasts state-of-the-art production technology, ensuring the highest standards of product quality.

Our World

CERTIFICATIONS

The Integrated Quality and Environmental Management System governs the entire company and is oriented towards continuous improvement. Gessi has been certified for the company's production method and systems according to UNI EN ISO 9001 since 1996. Gessi represents a very rare case of a company that possesses a triple certification for quality, environment and safety. Gessi boasts product quality and conformity certificates issued by the most renowned certification bodies around the world. They guarantee consumers that Gessi products possess quality and safety characteristics in accordance with local regulations, market requirements and legal constraints. The effort to continuously improve and exceed the certified quality standards confirms the unique and exclusive value of our products.

AT A GLANCE

EXTRACTIBLE HANDSHOWER

Pull out hand showers provide the greatest freedom of movement. Press the button to switch from a softer aerated flow to a forceful jet spray. The hand shower mixers (single and double jet) are equipped with specially designed components that minimize limestone deposits and also includes a non-return check valve.

EXTRACTIBLE HANDSHOWER

CESSI SHINE SURFACE

The special Gessi plating process ensures surfaces are resistant to stains guaranteeing a long lasting and durable sheen to your finish.

SWIVELLING SPOUT

All kitchen mixers have a rotating spout, up to a maximum of 360°.

ROTATION ANGLE

CARTRIDGE TESTING

All mixers utilise ceramic disk cartridges that are tested to 70000 opening/closing movements; this correspond to 10 years of use by an average family of four. In the tests performed by Gessi, the cartridges did not fail until more than 200,000 opening and closing movements using medium/hard water. In addition, a “hammer test” is performed, which involves the rapid operation of the mixer, which exposes the cartridge to a sudden shock caused by the water pressure. The test is classified as a pass when the cartridge still operates at a water pressure of up to 50 bar.

GESSI

VENTI20

**BRINGING LIFE TO THE PLAYFUL ESSENCE
AND SENSE OF STYLE OF THE ROARING '20S.**

Released in 2020, the Venti20 is a re-imagining of a by-gone era with a confidence and enthusiasm for life. This distinctive design incorporates elements from one of the most influential periods of 20th century art and design – perfectly adapted for contemporary living.

60634#720
Goose Neck Semi-Professional Mixer

60634#720
Goose Neck Semi-Professional Mixer

THE SPIRIT OF THE TIMES

With measured retro notes, but without longing for nostalgic replicas, the VENTI20 collection was conceived by GESSI together with the Spanish designer and artist, Lazaro Rosa Violan.

HABITO

collection

A COMBINATION OF ELEGANCE AND TECHNICAL REFINEMENT

This distinctive Gessi style is defined by the study of simple lines, which give the aesthetic of Habito a formal, clean appearance, enhanced by a lavish attention to detail. The tap body, elegantly slender, gives a majesty and grandeur that make Habito the champion of the kitchen.

60652#708

Sink mixer with single-jet handshower

The mixer handle developed in several components including the diamond engraved lever, now iconic in the GESSI collections, contribute to defining the style of this collection. The range includes classic swivel, pull out hose and semi-professional flexi hose designs, in round and square goose neck spouts.

OFFICINE V

collection

A modern take on the classic characteristics of early twentieth century industrialisation.

The Officine V Collection from Gessi is a new series that revisits, with a modern take, the classic characteristics of early twentieth century industrialisation. Available with a swivelling spout, pull out or semi-professional flexi hose, Officine V stands out for its distinctive industrial style.

DESIGN: GESSI STYLE STUDIO
GESSI PATENT

OFFICINE - GESSI collection

AN INSPIRED NEW 'MECHANICAL' DESIGN WITH AN INDUSTRIAL CHIC STYLE.

Gessi's Officine collection has its origins in the growing popularity of 'industrial' style; a movement that has influenced the interior design of private and commercial architectural practice in recent years.

With its aesthetic characterised by materials, forms and finishes that are typical of a 'production' or 'manufacturing' environment, the Officine range has a strong, iconic, utilitarian look and feel.

HAPPY collection

GESSI'S DESIGN RECALLS IN A CREATIVE WAY THE OPTIMISTIC SPIRIT OF THE FIFTIES AND THEIR ICONIC STYLE

Celebrating the height of mid-20th Century modernism, the Happy Collection from Gessi recalls the optimistic spirit of the fifties and its distinctive industrial design.

Iconic objects of the 50's and 60's are universally recognised as enduring examples of quintessential modernism. Inspired by these products, the Happy Collection elegantly, and playfully, recalls and revises the style of this iconic era; from the choice of finishes to pure, bold aesthetic details.

SU&GIÙ

collection

A STYLISH AND PRACTICAL SOLUTION FOR MODERN KITCHENS

As living spaces become more flexible, the kitchen often opens onto the living room, or an alfresco area, sometimes with a sink under a window. In these situations, a sink mixer that can 'disappear' discreetly into the bench, and out of the way, is an ideal solution for an open workspace.

For this reason, Gessi has developed the Su&Giù or 'Up and Down' Collection: unique hide-away mixers with fully adjustable height.

60071#707
Retractable Spout Right Angle Mixer

RETRACTABLE SPOUT

This unique series of hide-away retractable mixers can be lowered into the kitchen bench; and returned to their original height while remaining operable.

INEDITO

AN ENDURING, MINIMALIST DESIGN, DRAWING INSPIRATION FROM PURE, GEOMETRIC FORMS.

Gessi's Inedito Collection brings a new purity of design to the kitchen; with a solid feel, pleasing proportions and a geometric style. Inedito, minimalistic and modern thanks to intersecting cylindrical shapes, rediscovers a style that elevates it beyond changeable fashion to an enduring design suitable for all kitchen styles.

PROTON

collection

A COMBINATION OF PERFECT PROPORTIONS AND PURE FORM.

Gessi's commitment to creative experimentation and innovation once again manifests itself in a design that transcends time and trend. The Proton Collection is elegant with a striking profile, created by the combination of organic and geometric styles. Equally suited to contemporary and classical interiors, the Proton is both relaxed and confident.

17153#299
Goose Neck Pull Out Mixer

PROTON MERGES HARMONY AND ERGONOMICS FOR INNOVATIVE INTERIOR SETTINGS

The minimalist style and attention to every detail, that has made Gessi acclaimed on a world level, are once again evident in the distinct and essential style of the Proton collection.

ACCIAIO

collection

PURITY OF MATERIAL AND DESIGN.

Stainless steel is one of the few materials that boasts exceptional durability while maintaining an impeccable shine, timeless elegance, and intense color - with minimal maintenance required over time.

Acciaio 304 stainless steel tapware is pure in form, functionality and material use.

Fully recyclable, stainless steel can be regenerated and reused indefinitely, making the Acciaio a valuable contribution to reducing the consumption of natural resources.

CARE & MAINTENANCE

GESSI S.p.A. products are manufactured in different materials to suit all market, design and functionality needs. The surfaces of the products manufactured by GESSI S.p.A., for both indoor and outdoor environments, are obtained using the best materials and approved production processes and they are constantly enhanced by advanced quality certification methods.

The resistance and durability of all the types of material mentioned above are closely linked to proper use, good maintenance and the use of suitable cleaning materials and products that preserve the original characteristics. Therefore, the appearance of spots of rust or limescale deposits are clear indications of incorrect or lack of cleaning and not the result of defects and/or poor quality of the materials used.

- Therefore, in order to fully appreciate your Gessi product and preserve its aesthetic quality, consider the following:
- The pollutants found in rainwater or the limescale in mains water remain in the form of stains on the surface of the product once the water has evaporated. It is possible to prevent the formation of deposits and keep your product clean by always drying it with a soft cloth.
 - DETERGENTS, SOLVENTS, CHEMICAL AGENTS, ABRASIVE SPONGES, WIRE WOOL, ALCOHOL, PRODUCTS CONTAINING CHLORINE AND ITS DERIVATIVES, ETC. MUST NOT BE USED as these may irreparably damage the product surfaces, thus compromising their aesthetic qualities, brightness and satin finish. REGULARLY CLEAN THE PRODUCT WITH ONLY WATER AND A NEUTRAL SOAP, WIPING IT DRY WITH A SOFT DISPOSABLE CLOTH.
 - Regularly clean the filters upstream of the product, in addition to those mentioned above, after having disassembled them and removed the limescale obstructing the outlets. Regularly clean the distribution points too, for example by slightly rubbing the distribution nozzles so as to free them of any limescale and keep the diffuser clean.
 - When using spray-on soap, spray it onto a clean cloth or sponge, NEVER directly on the product.

CLEANING GUIDELINES

- (*) **SPECIFIC GLASS CLEANER:** use on low dirt. Spray the product on a sponge or cloth and wipe the surface. Dry accurately.
MULTIFOAM: use to remove grease and fingerprints. Spray on a cloth, wipe the surface and dry thoroughly
ETHYL ALCOHOL: suitable for removing grease residues or persistent dirt. Wet the cloth with a little amount of it, wipe the surface and dry accurately
ISOPROPYL ALCOHOL: indicated for removing grease residues. Put a little product on a cloth, wipe the surface and dry very well.
UNIPOL (WARNING: THIS ABRASIVE PASTE MAY SCRATCH THE FINISH): use to remove chrome stains, and polish steel surfaces. Put it on a cloth, wipe the surface, then wipe with a cloth soaked with specific glass cleaner and dry properly.

- (**) **WHITE SPONGE:** Suitable for cleaning lightly persistent dirt. Wipe the sponge over the surface. CAUTION: CLAN SOFTLY
MICROFIBRE CLOTH: Suitable for removing dust. CAUTION: BEFORE WIPING, CHECK THERE ARE NO RESIDUES THAT COULD SCRATCH THE SURFACE.
PAPER CLOTH: Suitable for removing dust. It can also be sprayed with cleaning products (do NOT spray such products directly on the surface). CAUTION: BEFORE WIPING, CHECK THAT THERE ARE NO RESIDUES THAT COULD SCRATCH THE SURFACE.

- (***) AFTER CLEANING WITH WATER, **DRY EACH SURFACE IMMEDIATELY** TO PREVENT THE APPEARANCE OF LIMESCALE STAINS. THE USE OF DEIONIZED WATER WILL PREVENT THE FORMATION OF SUCH STAINS. CLEAN THE SURFACES FREQUENTLY TO AVOID EXCESSIVE DIRT OR FINGERPRINTS AND TO MINIMIZE THE CLEANING EFFORT, COST AND THE RISK OF SCORING/ALTERING THE FINISH.

- (****) **INSTRUCTIONS FOR STAINLESS STEEL SURFACES CLEANING:**
Brushed stainless steel may show fingerprints in the early stages of installation, but these will become less noticeable after the first few cleanings. The most effective products for removing fingerprints or other types of stains are water with soap or a mild detergent.
Stainless steel with a mirror finish can be cleaned with specific products usually used for cleaning glass: most importantiv. they must not contain chlorides. Do not use abrasive products as they can leave irreparable scratches on stainless steel surfaces. Alternatively, to remove contamination, a specific stainless steel cleaning product containing phosphoric acid may be used, carefully rinsing with clean water and drying. It is advisable to treat the entire stainless steel surface to avoid stains.
Traces of mortar and cement can be treated with a solution containing a small amount of phosphoric acid. Rinse with water (preferably deionized water to reduce the risk of leaving stains) and dry. Never use any type of product specifically designed for mortar removal or diluted hydrochloric acid: if these are accidentally used or spilled on stainless steel, rinse thoroughly with clean water.

DO NOT USE PRODUCTS CONTAINING CHLORIDE (ESPECIALLY CHLORIDRIC ACID), HYPOCHLORIC ACID CANDYGINS, OR PRODUCTS USED TO CLAN SILVER. If accidentally spilled on any stainless steel surface, rinse thoroughly.
To remove light dirt or fingerprints, use a damp cloth or suede leather; for more persistent dirt, nylon sponges are recommended.

DO NOT USE ABRASIVE WOOL PADS AND NON-INOX WOOL PADS: in addition to scratching, they can leave carbon steel deposits that, in the presence of humidity, could result in rust stains.
On polished finishes with a unidirectional surface texture, cleaning should be done with movements that follow the direction of the finish, not across it. To avoid contamination by iron particles, it is necessary to ensure that the cleaning tools chosen have not been previously used on carbon steel. In fact, materials for cleaning stainless steel workpieces must be reserved exclusively for this purpose.

SERVICE & WARRANTY

IF YOU ENCOUNTER A PROBLEM
