Semi Recessed Vanity Basin

Installation instructions for Semi Recessed vanity basin

THIS BASIN MUST BE INSTALLED BY A LICENSED PLUMBER IN  
ACCORDANCE WITH LOCAL REGULATIONS

### Remove all products from packaging:

Check the product for damage, if the product is damaged return to store of purchase.  
Check the product is complete with all components required to install.

This product is to only be installed by a licensed plumber, failing to do so will void warranty.

This product is to be installed as per Australian Standard and local authority requirements.

### Basin Installation:

1. This basin is supplied with a cut out template, due to manufacturing variations it is recommended you cross check the cut-out template dimensions against the physical basin dimensions and adjust cut out size as, or if required.
2. Lay the template in the desired position on the bench and fold marked area down the front of the bench top and tape down to secure the template into position.
3. Prior to cutting the hole, check to ensure the cut-out does not interfere with draws or internal walls of the vanity cabinet.  
N.B As this basin is a semi-Recessed basin and the front of the Vanity cabinet is to be cut away ensure doing so will not diminish the strength of the vanity cabinet.
4. Cut the hole into the vanity cabinet top and front face.
5. Fit the basin into the cut-out hole to ensure the basin fits correctly and no further adjustment of the cut-out hole is required.
6. Prior to fitting the basin it is recommended the tapware and waste are assembled to the basin for ease of assembly.
7. Prior to fitting the basin to the bench top run a bead of plumbers grade silicone seal around the cut-out hole.
8. Insert the basin into the bench top cut-out and align so the basin is square to the vanity top.
9. Apply a bead of plumbers grade silicone around the outer edge of the basin to prevent water going under the basin. Allow the silicone to dry.
10. Connect Basin to drainage system as per Australian standards and local
