

Oliveri®

THIS MIXER TAP MUST BE INSTALLED BY A LICENSED PLUMBER IN ACCORDANCE WITH LOCAL REGULATIONS

This Oliveri tap is manufactured to standard AS/NZS 3718.

MAX OPERATING PRESSURE:.....5 bar (500kPa)
 RECOMMENDED OPERATION PRESSURE:.....1.5-5 bar (150-500kPa)
 MAX HOT WATER TEMPERATURE:.....65°C
 RECOMMENDED HOT WATER TEMPERATURE:.....50°C

Where water pressure exceeds 500kPa, a pressure reducing device is required to be installed. Note that water pressure overnight can reach 150% of the daytime pressure.

Note: Ceramic Cartridges - Warranty claims will not be honoured where the ceramic cartridge has malfunctioned due to the presence in the water supply of;

- Copper tube pieces, sand, dirt or stones
- Thread tape
- Other objects not normally present in potable water supplies.
- Do not remove the cartridge from the body as it has been pressure tested and tightened to a specific torque.

Before attempting any work involving mains water supply lines, ensure the water supply is shut off.

This mixer tap must be installed in accordance with these instructions.

Prague Bath and Shower Mixer

CARE & MAINTENANCE

Clean with a soft cloth and warm soapy water as necessary - rinse and dry after cleaning. Under No Circumstances should abrasive or acid based cleaning products be used.

WARRANTY

This mixer tap is warranted to be free from manufacturing defects for a period of 15 Years:15 years for cartridge 10 years for body, 5 years for seals, tails and fittings, 1 year for finish and labour, when used in a domestic situation.

This warranty does not cover against normal wear and will be voided if the product is misused or not installed in accordance with these instructions.

In the event this product is rendered obsolete and a replacement product is required, Oliveri Solutions Pty Ltd reserves the right to supply a product of equal substitution at their discretion.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

SERVICE

If the problem represents a danger, or damage to property may occur, immediately shut off the water supply.

If the product requires servicing, please contact your plumber / Installer (preferably the one who installed it).

If the Plumber / Installer is satisfied that the problem is not due to poor installation, contact T2 Services Pty Ltd for assistance on:

Ph: (07) 55960738

Fax: (07) 55273353

Email: oliveri@t2services.com.au

If a warranty service agent finds that the mixer tap is not at fault, T2 Services Pty Ltd reserves the right to pass on any callout fee to the householder.

Installation Instructions

General Note: This product is to be installed by a licensed plumber, installation must comply with AS/NZS 3500 and local plumbing codes.

Pressures & Temperatures

Maximum Hydrostatic Pressure – 500 kpa. (As per AS/NZS3500)

Note: AS/NZS 3500.1-2003 (Clause 3.3.4) states that "Provision shall be made to ensure that the maximum static pressure at any outlet, other than a fire service outlet, within a building does not exceed 500 kPa.

Note: Pressures above 500kPa can cause damage from water hammer, reduced life of appliances, taps and fittings, and cause excessive noise in the system.

Minimum Hydrostatic Pressure – 100 kpa

The Maximum operating temperature for the Mixer Tap is 65 °C.

Please ensure that the lines are flushed prior to installation as contaminates in the water can damage the Ceramic Cartridge and also affect the performance of the Mixer.

1. Remove product from packaging and check for damages, if the product is damaged do not install and return to store of purchase.
 2. Ensure Product is complete as per exploded drawing.
 3. All Shower and Shower Divertor Mixers are supplied with Plastic Protection Body covers, ensure the body cover is on the mixer body and push pull dial on divertor Mixers prior to installation.
 4. Screw Mixer Body (A) to the Stud Wall or Brick Cavity taking into account set out minimum and maximum from back of Mixer to Finished Wall (F).
 5. Install Water supply to Mixer body, Left (Hot), Right (Cold) as per AS3500 and Local Authority requirements.
 6. Install water supply lines for shower and/or bath outlets.
- N.B Shower/Bath Mixers (Not Divertor Mixers) are a 3 Port Body, for Bath installation loop the copper pipe to the underside of the mixer for bath installation. DO NOT turn Mixer upside down as the Mixer will not function correctly.**
7. Once wall sheeting and tiles have been fitted seal around the Mixer body with plumbers grade silicon or sealing compound.
 8. Slide Mixer Wall plate in Place (B) N.B Shower/Bath Wall Plates and Shower & Bath Divertor Wall plates are fitted with concealed sealing washers, to assist with assembly of the wall plate onto the mixer body apply soapy water or plumbers grade grease to the concealed sealing washers.
 9. Fit Mixer Handle (C).
 10. Screw in handle grub (D) using Allen key (E) press the cap (G) in to the handle (C). Take down the pre-assembled Cap (J) and Screw (I) from Knob (H) and press Knob (H) into diverter on the body (A). Lock the Knob (H) with Screw (I) and press the Cap (J) in to the knob.
 11. N.B Some Grub Screw covers are also Hot and Cold indicators, ensure when fitting a Grub screw cover on the handle that has the hot and cold indicators that the Red (Hot) is on the left hand side.

To the consumer

1. The Mixer is to only be cleaned with warm soapy water.
2. **Under No Circumstances** should any abrasive, cream or acid based cleaning agents be used as these types of cleaners will damage the finish, Cartridge and seals.
